Accessories Supplier**
Nicols Bros. Stoneworks

The client wanted a clean, yet sophisticated, unique design for the lobby, located on the 40th floor. Existing symmetrical beds and the birds-eye view influenced the plant selection and layout.

Two large beds with stark white concrete bowls sitting atop a bed of black sand pop with seasonal color. The background for these beds is a mass of *Dracaena marginata* 'Colorama,' with its spiky texture and vibrant red color.

Crocodyllus adds a light green color with a rigid texture in the lower planter.

Contemporary beds are designed with sheet moss, dwarf Ophiopogon, *Kalanchoe thyrsiflora* and *Sansevieria Hahnii*. The fine detail of the moss is defined by black edging and the small compact texture of the Ophiopogon ground cover. Checkered squares of *K. thyrsiflora* are alternated with green sheet moss.
